ABADGARAN ARSHA SALYAN

OIL, GAS & PETROCHEMICAL

INTRODUCTION OF THE COMPANY

• AAS Group, leveraging years of experience and technical expertise in the Oil, Gas, and Petrochemical industries, as well as Renewable Energy and Mining, has established itself as a pioneer in the design, procurement, and execution of industrial projects. We benefit from powerful strategic partners in Engineering, Procurement, and Construction & Installation, including Grade-1 EPC contractors, specialized manufacturing plants for static equipment (including storage tanks, pressure vessels, steel structures, heat exchangers, and other process equipment), and reputable stockists* both domestically and internationally.

Our goal is to contribute to the development of Iran's key infrastructure through a commitment to unparalleled innovation and superior quality. Partnering with AAS provides not only access to the best industry solutions but also a reliable partner with extensive capabilities to realize your future vision. We are ready to build the future with you."

E

Engineering

Precise design of industrial projects using the most advanced software, optimizing processes, and ensuring quality and accuracy at every stage.

Procurement

Supplying world-standard equipment from a vast network of domestic and international suppliers, focusing on quality, timely delivery, and competitive pricing.

C

Construction

Executing construction and commissioning projects with specialized teams, adhering to international standards, ensuring efficiency and full safety of the units.

P

DESIGN AND ENGINEERING SECTION

At AAS Groups, our Design and Engineering department serves as the heartbeat of every industrial project. Utilizing modern technologies and advanced software, we provide precise designs that meet the latest global standards. Our experienced and highly skilled engineering team transforms complex processes into simple, efficient solutions.

To optimize time and cost, we employ innovative methods and 3D modeling techniques. This approach not only enhances design accuracy but also allows for the simulation of system performance. With this strategy, you can be assured that your projects will be executed effectively and deliver the best possible results.

With AAS Groups, you are taking steps towards building a sustainable and efficient future.

EQUIPMENT SUPPLY SECTION

- Ensuring At AAS Groups, our Equipment Supply division is dedicated to that your project has the highest quality equipment at every stage. From the moment you place your order, our experienced team works tirelessly to source equipment from reputable domestic and international manufacturers.
- We prioritize quality, reliability, and timely delivery, leveraging our extensive network to meet your specific needs. Our rigorous selection process ensures that only the best products are chosen, aligning with international standards to guarantee optimal performance in your projects.
- With us, you can trust that your supply chain is in expert hands, allowing you to focus on what you do best—driving your projects to success. Partner with AAS for a seamless, efficient, and professional equipment supply experience.

CONSTRUCTION AND COMMISSIONING SECTION

AAS Group (Abadgaran Arsha) leads the industry in the construction, installation, and commissioning of oil, gas, and petrochemical projects in accordance with the highest global standards. Leveraging strategic partnerships with Grade-1 EPC contractors and specialized manufacturing facilities, we possess special expertise in the construction and installation of large-scale projects; these capabilities include civil works, fabrication and installation of mechanical equipment—specifically static equipment (pressure vessels, storage tanks, steel structures, heat exchangers, and other process equipment)—as well as electrical and instrumentation (E&I) works.

Our specialized team employs advanced techniques and modern equipment to execute projects comprehensively and with precision. We are committed to safety and quality, meticulously overseeing every stage of construction and commissioning to ensure efficient plant operation and the highest performance for our clients. With AAS, you will experience reliable and

AREAS OF ACTIVITY

AAS specializes in providing comprehensive and professional services in various sectors of the oil, gas, petrochemical, and renewable energy industries, backed by deep expertise and experience.

Our areas of activity include: Design and Engineering: Providing engineering design services for oil and gas projects, including pipeline design, facilities, and processing units.

Equipment Supply: Sourcing and supplying high-quality equipment for industrial projects, including pumps, valves, and control systems.

Construction and Installation: Executing construction and installation projects in the oil, gas, and petrochemical sectors while adhering to international standards.

Commissioning and Operation: Providing commissioning and operational services for oil and gas facilities, including testing and performance verification of equipment.

Renewable Energy: Developing and executing renewable energy projects, including solar and wind energy.

At AAS, we strive for innovative and sustainable solutions to enhance quality and increase efficiency in the industry.

KEY CAPABILITIES OF THE COMPANY

At AAS, we take pride in providing an unparalleled experience of collaboration and partnership with our clients. Our technical and engineering capabilities are designed to address the unique needs of your projects effectively. We are with you not only in design and execution but also in securing financial resources and offering effective solutions.

By thoroughly analyzing project requirements and leveraging specialized consulting, we help you identify the best financing options while simultaneously advancing your project goals.

At AAS, we believe that the success of any project results from close collaboration and positive interaction with the client, and we are ready to elevate this interaction to the highest level.

DUTIES

Human Resources

- Recruiting, training, and developing personnel

Marketing & Tendering

- Market analysis & executing advertising & developing expansion strategies

Procurement

- Managing to supply materials and equipments

Finance & Contract

- Managing financial resources and monitoring expenses

Installation & construction

- Overseeing project execution and managing risks

QA/QC

- Monitoring the quality of products and services

Engineering

- Recruiting, training, and developing personnel
